Aviso Multiline The program is designed to help users create various 2D and 3D designs which can be used for outdoor and indoor projects. Through its easy-to-use design, users can easily perform several different tasks, such as inserting various objects, including walls, doors, windows, opening elements, room divisions, roofs, stairs, cabinets, appliances, interior furniture and lightening objects, electronic equipment, and plumbing fixtures. While the program itself comes bundled with numerous pre-loaded presets, it sports a clean and straight-forward layout that makes sure users can manage the software in an uncomplicated way. You can insert walls, doors, windows, opening elements, room divisions, roofs, stairs, cabinets, appliances, interior furniture and lightening objects, electronic equipment, and plumbing fixtures. For each of the aforementioned object, the program consists of several editing tools specifically built for helping you lengthen or shorten walls, move or delete doors, flip or remove windows, raise or lower a wall opening, automatically insert floors through your model, and apply different materials to the floors. Additionally, you can rotate or delete stairs and ramps, automatically insert a roof over the wall layout, undo or redo your objects, as well as perform basic editing operations with the selected objects, namely move, rotate, copy, mirror, or delete. Furthermore, you can preview the objects in a dedicated pane, set up the building location parameters, and hide or reveal an entire location, elements from a specific location, as well as notation objects, such as text and dimensions. Last but not least, you can use hotkeys, opt for a 2D or 3D mode (enable the camera mode for analyzing the whole view of your design), print the generated design, and perform search operations. During our testing we noticed that the program carries out a task very quickly, provides excellent image quality, and no errors showed up during the process. What's more, we have been able to get the entire editing process done with hardly any errors in just a few clicks.
