
Motorola Boot Screen V3i Downloads

Dec 26, 2009 - Dear sir, I have Motorola v3i and stuck on the bootloader screen with this error message, "phone code error sig v3i r47a_g_08_d8_89r" I did a factory reset so the phone is now Android 2.2 and I installed the latest software. I also installed firmware 2.3.5 which was not the latest, but that didn't matter. I tried to flash via Odin but couldn't because the phone wouldn't boot into DOWNLOADER mode. Then I found that I could flash through the Downloader Tool and it worked so it took a while but I did it!
