What's New In?

The theme is based on a blurred star map. When you change the desktop

wallpaper to the planet or the star map, you are see the sparkling planets or stars on your desktop. For some reason I can't put this in the software center.

EDIT: I was able to add it, but it's not the most user friendly way. What's the best solar system you know? Look at the planet Earth. That is the BEST solar system that we know. Why do you think so? Think about the fact that within our solar system are

many, many rocks. And it takes the CO₂, thrown off by the sun, and makes many different rocks, called rocks. It makes many strange rocks, called rocks. It makes the rocks, such as iron, and rocks, such as minerals. And we are the ones to see all these rocks, but the sun is the one who threw the rocks into our solar system. So we know all about solar systems and stars, even though we know

NOTHING about other galaxies and galaxies because it is just out of our reach. And what do you think is the coolest planet? Here is my favorite planet, which I discovered by myself. It is called Jupiter. Because it has many strange rocks that we can't even imagine. What do you think about Jupiter? What's the best solar system you know? Look at the planet Earth.
