Q: Installing java in eclipse on ubuntu 12.04 I downloaded an.rpm file for Java Development Kit (JDK). I extracted the file on Ubuntu and installed Java using the following command: `sudo apt-get install openjdk-6-jdk` I also downloaded a zip file for java and extracted it. It didn't make any difference. When I go to eclipse to launch Eclipse, I get an error message: The error message is: Unable to access repository An unexpected error has occurred. See error log for details. Java Runtime Environment (JRE) or Java Development Kit (JDK)
