This article first appeared on pcWorld.com, but you can see a lot of other points of view in The Start-Up's Guide to Small Business Computing. Most business software today is geared towards larger companies with sophisticated infrastructures, but the fact is that for smaller businesses, there is a wide gap between what business software can do and what is really needed. It's all too common to hear complaints from small business owners that these small businesses could benefit from software for much more mundane tasks, like payroll and accounting. And with Lightweight email clients can't keep up with the heavyweights, but the new IKM Mail project has some serious muscle, if you've got a fast PC. Email clients are like mailboxes. Just about every single one of them offers the same features: Inbox, Outbox, Drafts, Sent, Deleted Items, Trash. (Whether the Junk folder is a single entry or a separate subfolder depends on the software.) Each of these feature sets comes with its own pain points. For instance, one of the problems with the Inbox feature is that it usually has no built-in search capability. Another is that, even though many clients offer the ability to save drafts, you can't save drafts permanently, so you end up having to take draft b7e8fdf5c8
