AutoCAD supports scripting languages that allow users to interact with the program's automation features. Examples include AutoLISP, Visual LISP, Visual Basic for Applications, .NET, or ObjectARX.

Autodesk Exchange Apps allow users to use AutoCAD for Macintosh to make non-AutoCAD applications. AutoCAD can be used to automate many aspects of design. It is used extensively in the industrial design industry, particularly to cut glass for tableware such as bowls and plates. Some notable users include, for example, Dishwashers (GE's) dishwasher wash solution that uses AutoCAD to cut the tempered glass. The animation of architectural computer-aided design processes can be done through a number of tools like AutoCAD, Autodesk Animator, etc. Rendering tools AutoCAD can be used as a rendering application to generate either raster-based images (e.g., 2D rendering) or vector-based images (e.g., 3D rendering). The rendering engine consists of one or more applications in which 3D primitives, such as 3D meshes, textures, lights and cameras, can be defined and

modeled. When the final output is generated, it is usually either a 2D raster file or a 2D image or an output device-specific file format. AutoCAD has three main rendering engines: The first, Easy Slicing, was based on the previous Q3 graphics engine. It is aimed at the needs of AutoCAD architects, designers, and draftsmen, as well as for those of the general design community. It allows the user to create and work on their models directly in the drawing window. The results are rendered as either an output file or as a screen or film. The second rendering engine, called New Technology (NTR), was introduced in AutoCAD 2007. NTR is based on the newer rendering engine named V-Ray. It uses the same ray tracing rendering model as V-Ray and can therefore also render the results in a similar way. AutoCAD Architectural, and AutoCAD MEP are the third and newest rendering engines, respectively. Autodesk NTR is a rapid-prototyping ray tracing software tool designed specifically for the rapid rendering of highly realistic and realistic 3D computer graphics. NTR is the newest rendering engine for AutoCAD. It was released on August 11, 2007. N ca3bfb1094
