. A: According to my investigation this error occurs if you run UI on 64 bit system but you pass 32 bit image to it. In this case you will not get the message, instead of this you just get blank UI screen. As per documentation it states You should configure the project to use the same operating-system environment as the Autodesk Revit design software that you are using, such as Windows 32-bit or Windows 64-bit. The design software requires that you have the installed the same Visual Studio release that you are using to create the project. In your case you are running 64 bit of Autocad design software on 32 bit operating system and it's not working. Please check this link to resolve this. It says to do as follows. Launch Autocad when you open Autodesk Revit, select Autodesk Revit>>Document\Open > Autocad> View>>Open Select 32bit. You should now be able to open the file in Revit. And also check this link to get the same result. /* * Copyright 2015 Google Inc.
