FIFA 22 Superstar Mode gives players the chance to create their very own, unique "PRO-FOOTBALLER" by starting out with a low-level character and a set amount of skill points and training - then boosting them through skills and an XP system to reach the next level. Players have to look after their football through nutrition, strength and fitter, as well as completing interactive challenges, whilst choosing whether to raise the game's skill level or to let the game work for them. Augmented Reality Augmented Reality Augmented Reality (AR) technology makes the field of play ever more immersive. With it, players can see on-screen the lines on the pitch they've marked out, or interact with the virtual characters on the pitch. Players can also see the movement of the ball and players on the pitch in-game. It also lets players see the information around them on other surfaces; broadcast graphics can be superimposed on glass windows or a graphical HUD makes it easier to read on the lines on the field of play. FIFA Ultimate Team (FUT) brings the world of football to life by introducing a brand new dynamic gameplay mechanic – the Draft. A brand new board will also include an array of special icons allowing for additions to be drafted from popular clubs. A League mode will also allow players to manage their club as they compete in the FIFA calendar. FUT champions will be crowned throughout the 2019 FIFA calendar, beginning with the EA SPORTS FIFA 20 World Cup. Community Creation and In-Game Customisation The new icon editing system allows players to create their own designs and visuals, allowing you to match your aesthetic with the in-game squad. Players can set their own colours, write the team slogan, and upload their own pictures or art to create their perfect team. Story and Romance Big announcements about the FIFA 20 story and romance line-ups will be revealed in 2019 with the arrival of the 'Bull City' expansion on 15 March in South Africa. Bringing you closer to the action, there is a new new new romance line-ups ha
