Q: Add touch listener only for top-most subclassed EditText I have an editText in a ScrollView. I subclassed the EditText to look like a button. In the onTouch() event I want to add the standard EditText functionality. How can I add a touch listener just for the top-most EditText? A:

```
myEditText.setOnTouchListener(new View.OnTouchListener() { @Override public boolean onTouch(View v, MotionEvent event) { v.getParent().requestDisallowInterceptTouchEvent(false); return false; } });
```
