Steven starts by going to the tailor and being fitted for a brown suit. Steven soon ends up in a high-speed chase, where he had just robbed a bank. Reviews COSS - The History of the Name CHEW: Once upon a time, there was an open source P2P network called COSS. It was one of the most well known and longest running. They were so well known that it was ported to Windows and they were featured in PC World magazine! That is, until it was taken down in the name of corporate interests. Since then, the game and network was down to just the name. The official website was taken down. Even the IRC channel was gone for about a year. Now, almost 10 years later, the only trace of the game is a few collectors editions from the original team, and this recently released digital port from Kickstarter. This game is the oldest digital copy of COSS I have. CHEW: The GalaxyNext is the Next Generation of this iconic game! Everything from the original COSS is here - the chat, helpdesk, online store, and more. New features include your own team, the ability to change the on screen
