## What's New In ImageConverter Plus?

This program has a name that pretty much explains its purpose: ImageConverter Plus allows you to easily convert pictures between mutliple formats, including JPG, GIF, PNG and BMP. The interface of the application is simplistic and intuitive. Image files can be imported into the queue by using either the file browser or the "drag and drop" method. Batch processing is supported. In the list you can check out the name, type, file properties, size and path of each picture. Once you specify the output destination and format, you can initiate the conversion process. In addition, you can paste files from the clipboard, remove selected items from the list, preview pictures and create a new profile. On top of that, you can resize, rotate and crop pictures, add watermarks, apply various filters (e.g. blur, sharpen, emboss, watercolor), replace colors, make image adjustments (e.g. brightness, contrast), and more. The simple-to-use application requires a moderate-to-high amount of system resources, can guide you to a complete help file with snapshots and how-to guides online, quickly finishes a task and didn't freeze or crash during our tests. The image quality is maintained at a very good level. All in all, ImageConverter Plus is a very good program for changing the extension of image files and we strongly recommend it to all users, regardless of their experience level. Last week, I published a post about the problems I encountered with OneDrive. Not only the newly launched cloud storage service was not up to par, but I also couldn't sync my OneDrive account with my Google Sync account and vice versa. However, today, Google made the Sync account on its Google Cloud service available for OneDrive users, giving a few of them access to other data like Calendar and Contacts information. In this post, we will discuss how you can take advantage of that and sync your OneDrive account with your Google account. How to Sync Your OneDrive Account with Google: 1. You need both of the cloud storage services, OneDrive and Google, to be compatible with each other. Now, Google Sync is available for OneDrive users but they will not be able to access Google Apps-like services such as Calendar and Contacts. The original plan was to provide a direct sync function between the two accounts but apparently, it is not a straightforward one yet. 2. Right
