It will be a few short years more before our current great war of words will come to an end, or more likely, be discontinued for our own good. Of course, we live in an age of special events, not only on the sporting events, and in the past century, the great "epochs" have been great in their own way; the 1860-65 Civil War, the American Revolution, and the War to Settle the Territories. Symbol Panel: Bring back the Symbol Panel or check the one you have open at any time in the active drawing. Open the panel at any time and work with the symbols, notes, or information that you added to it. (video: 1:26 min.) You can set the guide to be visible or hidden when you need it, and move it to any point in the drawing that you want. With the Laser Mark Visual Styles, you can add a laser-like icon to any point in the drawing, which you can then use to quickly and easily create a laser-like guide. The Laser Mark guides automatically follow the movement of your cursor as you work, and even adjust to accommodate your screen view. (video: 1:07 min.) Drafting and Layouts: Create your own Drafting Template. With the Drafting Template tool, you can save your own drafting templates for use in multiple projects. The tool will generate a set of components and sub-components that are the same size and orientation in a new Drafting

When you close the drawing, the components are saved to a DXF file. (video: 1:21 min.) Measure and Linearize: AutoCAD's Measure and Linearize feature lets you measure properties and angles anywhere in a drawing. You can measure points, lines, arcs, and surfaces, and you can measure dimensioned, textured, or snap-created objects and linear features. (video: 1:16 min.)
