"I do not use it [the iPhone 5S] because it's a symbol of happiness for the homosexual community," said Alejandro Chávez, a congressman and leader of the opposition National Action Party. "The iPhone is a symbol of the bourgeoisie, as is wearing a suit and tie," he said. He was asked about his comments by reporters in Tijuana on Monday while campaigning for his party's presidential candidate, Andres Manuel Lopez Obrador, the newspaper reported. Q: Verify an FTP client on windows What is the best approach to verify an FTP client on windows? Would it be possible to see if the transfer files is done as originally requested? A: Your best option is to make sure that you have the latest supported version of the browser you are running. Each browser has some option that allows you to see the activity of that particular connection. In Firefox, it is under the Network tab in the status tab. In Chrome, it is in the lower left corner. Also, try enabling Logging in your FTP client. If you see any errors in the log, you should be able to understand what's going on. If you have any scripting experience, you should also be able to parse the log yourself and troubleshoot it. SAN FRANCISCO (AP) - The nation's top U.S. drug enforcement agency is reversing course and saying vaping has become a gateway drug. Attorney General Jeff Sessions announced new policy changes Tuesday. He called the use of e-cigarettes "an epidemic." He said people "have started vaping and have moved from vaping to inhaling the gluey, highly-addictive, artificial nicotine." Sessions also said more than $1 billion has been spent by the industry on marketing to young people. A White House official said the administration believes they're targeted at kids and not adults. The official said vape shops are only required to obtain a business license and don't have to undergo regular inspections.
