Technical Field The present invention relates to a toner for developing an electrostatic image used in an image forming apparatus such as a copying machine, a printer, a facsimile machine or a multifunction peripheral, and a method for manufacturing the same. 2. Related Art In image forming apparatuses using an electrophotographic process, a toner for developing an electrostatic image is used in various methods. When the toner is used as a color toner, for example, toner images of yellow, magenta, cyan and black are formed, and then the formed toner images are transferred and fixed on a recording medium to form a color image. Moreover, a system in which the toner images are not directly transferred but intermediate transfer members such as intermediate transfer belts are used is known as a color-image forming method in recent years. In the intermediate transfer method, color toner images are sequentially formed on an intermediate transfer belt, and the
