DDL page as unavailable, other pages as available. Interactive CD/DVD LabelerÂ .Q: restrict access to certain urls of our website to specific ip addresses On our website we have different controller actions and views which should be accessible only from specific ip addresses. There is a mechanism which forces www.url.com to be redirected to www.url.com/index.php. Is it possible to do the same thing, but instead of redirecting, use some sort of a deny directive in our controllers or views, so that requests sent from specific ip addresses would be denied?

Is there a way to do such an thing in.Net MVC? A: you can use IP rewriting in your web.config to handle this Example (nuget package): c6a93da74d
