now we need to create the area method. we already defined it in the function, so we just need to type in the line `area = 100 * (width * height)` and press enter. in realbasic, we can use double parentheses to define functions and methods. this is an example of a method. `area = 100 * (width * height)` realbasic 2008 4.1 now let's create the triangle function. we can create it by typing in the line `triangle ()` and pressing enter. the `triangle ()` function will create a triangle for us. if we want to, we can create a triangle with two sides, by typing in

triangle (double, 100, 100) and pressing enter. if we want to create a triangle with four sides, we can type in triangle (double, 100, 100, 100, 100) and press enter. if we want to create a triangle with no sides, we can type in triangle (string) and press enter. this would give us a triangle with no sides.

realbasic is one of the oldest open source basic compilers available. what is so great about this is that you can download a copy and start using it right away. this is one of the things i like the most about open source. unlike proprietary development tools, they're available and free. all you need is a copy of the

compiler and a copy of realbasic. the compiler comes with many examples including a number of game examples. the user's guide, language reference, and additional features are very good and highly recommended. the initial setup of the compiler is easy, but it takes a bit of time to get going. i cannot stress enough how important it is to complete the realbasic quickstart before you try to do any serious development. this is where you learn the names of all the most important files, commands, and keywords. you can click on the image below to download a copy of the quickstart as a pdf. once you have completed the quickstart, you're ready to start developing. this is by far the most feature rich basic compiler available, and you can start using it immediately. this tutorial will introduce you to the features and syntax that make realbasic so powerful. for more information, visit the
