hello im looking to format my windows 7 with this and it doesnt seem to be working. first attempt i used the.zip file as the.iso in rufus. tried to boot from it and it said no drivers found. then i tried to extract the files but the rufus program doesnt recognize many of the files to use and im not sure which to try. please help! thanks! a few days back, we had told you about an option to get the windows 7 dvd from retail stores or download windows 7 iso directly from its servers online. in addition, customers can digitally download the windows 7 installation files from the online store from which they purchased windows 7 to clean install on a blank pc or upgrade the existing installed os. anand khansé is the admin of thewindowsclub.com, a 10-year microsoft mvp (2006-16) & a windows insider mvp. please read the entire post & the comments first, create a system restore point before making any changes to your system & be careful about any 3rd-party offers while installing freeware. luckily, microsoft didnt follow the trend of discontinuing windows 7, even after the extended support. the windows 7 iso is available from the windows 7 download page. it is a 700mb download, and the file is a windows 7 home premium 32-bit, or 64-bit, version. in the end, this is your best option to get the iso file for clean install of windows 7. you can download the windows 7 iso by clicking the above links. all you need is an internet connection to complete the process. once downloaded, you can install windows 7 in your pc as clean install or upgrade the existing windows 7 installation. if you are installing windows 7 clean, make sure you have an empty drive to install on, and if you are installing on an existing windows 7 installation, make sure your existing windows 7 installation is not set as the active os.
