July 8, 2561 BC Since 1988, CGTech's product, VERICUT software, has become the industry standard for simulating CNC machining for error detection. Since its launch in May 1995, VERICUT has become an integral part of many commercial and industrial establishments and industry standards. In December 2007, Vericut, Inc. announced its first market entry for open source systems. Since then, all versions of VERICUT have been released under the GPLv2 license. Under this license, VERICUT may be used free of charge and freely, with some restrictions for commercial use and provision of services. dd2bc28256
