If you dont need the compression strap, there is nothing wrong with the way it is designed. now, they are easier to navigate, hold larger items and have more pockets. while with the benefits of being open on both sides we can easily place things in the airline tray, its not quite as practical to do so on the bags front. however, we also found that it wouldnt be able to fit into an overhead bin on most airplanes. we did struggle to fit it inside a standard bin on ones where it would fit. i appreciate the lack of bulk though, since this backpack] great for using on buses or trains, where they have more room than in the aisle. this backpack was the #1 on our list of the 10 best travel backpacks, a list that was determined by reviewing the hard goods top picks from the test groups and then tallying the scores in each category. our top pick is the osprey farpoint 40, which was the product with the highest average score. it was excellent in terms of functionality, durability, comfort, carryablity, organization, design, and value.
