Consequently, between 1929 and 1944, the National Geographic Institute produced in a total of seven volumes of a complete map of the River Plate and its tributaries. Due to its high quality and the wide scope of its coverage, the 90th Anniversary Edition of this series of publications can be considered the most complete and accurate map of this region. Publication of the maps series - with their different types of formats, including maps of scales up to 1:5 million - created a lasting and well-known public image that is still considered an authoritative reference in the region. In this volume, the first three maps show the territory of Argentina, Paraguay, and Uruguay from the border with Chile to the banks of the Uruguay and Paraná rivers. They also includes the Paraná, Grande, and Salado rivers, as well as the entire estuary of the Uruguayan coast and the delta of the Paraná. In the remaining maps, the river system of the region is shown, from the mouth of the Uruguay in the Atlantic Ocean to the Uruguay, Paraná, and Paranaguá rivers in the interior of the country. The tributaries are shown as well. Finally, the last map is an overall presentation of the territory of the River Plate in South America. The map also includes an inset in which the river system is detailed and includes, among other things, tributaries to the Paraguay and Uruguay rivers. This book also includes a series of 18 maps, with a different scale and different information. These are: Area map with a scale of 1:5 million; Border of Argentina, Paraguay, and Uruguay; Map of the river system of Argentina; Map of the region of the Paraná and Paraguay rivers; Map of the estuary and the delta of the Uruguay coast; The full coastline of the Uruguay; The Paraná and Paraguay rivers; Map of the Paraguay and Paraná; Map of the basin of the Salado river; Map of the basin of the Grande river; Map of the basin of the Paraguay and Salado rivers; Map of the basin of the Paraná and Salado rivers
