Version 1.9.0 Description UnSafeDiscX Crack Mac is a collection of tools to help to remove the SafeDisc protection that is used in 99% of the games released this days. If you want to uninstall a program or make a backup copy of a game before removing the SafeDisc protection from it: 1. Right click on the game in your library and select Uninstall. 2. Click on the Save button at the bottom right of your screen and browse to where you saved the file. In order to use

UnSafeDiscX you must be at least 18 years old, or if you are younger, please make sure that you understand the risks of what you are doing and that you fully understand your rights and responsibilities as a PC owner, including those under COPYRIGHT LAWS. You may also want to consult your parent or guardian. If you do not meet any of these requirements you may not use UnSafeDiscX. About UnSafeDiscX UnSafeDiscX is a collection of tools to help to remove the SafeDisc protection that is used in 99% of the games released this days. It was created

by Branko who was trying to use the SafeDisc tools with the help of a friend and found that all the tools included in the package didn't work properly, so he created this new collection to fill this gap. Branko also provides a short video on how to remove the SafeDisc from a game, if you need to know how to do it in case of a game that you already downloaded you can watch the video on his Youtube channel (link below) Advantages of UnSafeDiscX The files are kept very simple and easy to use, meaning that the user will not need to be a

programming expert in order to remove the SafeDisc protection. This package will enable you to remove the SafeDisc protection from your games with ease. Expert users may want to look into the instructions included in this package and/or look into the other included tools to fully remove the SafeDisc from your game. UnSafeDiscX makes the process very easy. There are no external dependencies other than what the package provides (see below). UnSafeDiscX Disadvantages Because it is so simple to use, it might not be as reliable as

more complex tools. Even if you are looking for a simpler way to remove the Safe

* UnSafeDiscPlayer installs a small.dpl file that contains the mod for you so no need for a registry entry. * All functions are included in a single small file, no external downloads or installation required. * Gives the option to modify registry keys,

HKEY_LOCAL_MACHINE\Software\Microsoft\Windows\CurrentVersion\Authentication\EncryptingRegistrationInfo\Key\{ED1F3421-C71F-4C1B-A6B3-ABE09F6AADE1} in order to unprotect the disc from SafeDisc. * Once UnSafeDiscPlayer is running it will then have to wait for the disc to load and take control. * Once the disc has loaded it will also remove the file so you can see the disc is no longer SafeDisc protected. * You will be prompted with a decision at the end as to whether you wish to save the changes, the changes made will not be persisted on a

reboot. * Keyboard macro takes you straight to the disc unloader. * Plays the entire disc without checking disc integrity (safe), in this mode you will be able to use this disc however you want, it will not be checked for no signature. UnSafeDiscMacro: UnSafeDiscPlayer.exe thedisk (optional, shortcut to the disk to play) Play the Disc (optional) Save Changes You may not be prompted to save changes if you decide not to. How to UnProtect a Disc (safe): If you are not using UnSafeDiscPlayer this is the first step to making your disc ready for

playing, if you are you do not need to do this unless you want to use this tool. Run the UnSafeDiscPlayer.exe with the parameters: "C:\\Src*.*" "C:\\Obj" (optional, the full path to your game folder if you want to check it all). While this is running UnSafeDiscPlayer will monitor for any keypresses and run the Macro. Note that if you do not have another keymapping application this will only work with a keyboard macro and not with other software, for example if you have a mouse mapped to run the game, then you would need to set a keyboard macro to run the

game using the mouse. Once the main UnSafeDiscPlayer has started the program will 2edc1e01e8
